

Comfort Line2

Technology for people

Comfort, hygiene and safety.
Innovation that delivers true value.

Comfort Line2

Technology for people

Function meets efficiency and goes far beyond the norm.
More convenient, more hygienic, safer and more economical – these are the strengths of Comfort Line2.

Developed over many years in line with user requirements. This is how technology is shaped for people and opens up new worlds through creative design.

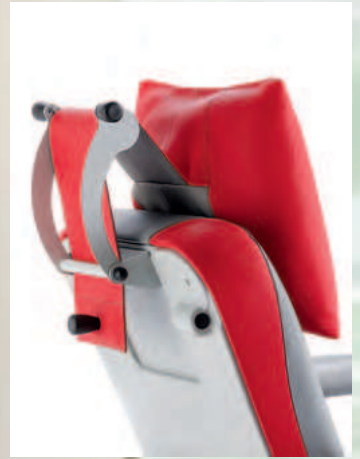

Innovative overload protection: The armrest springs back when the load exceeds 25 kg, thus increasing safety for patients when getting into the chair. At the same time, the overload protection prevents damage and reduces repair costs.

The armrest can be adjusted to the desired position with just one lever and can even be rotated completely. It can be operated instinctively, making it easy to learn even for new staff.

QUALITY
MADE IN
GERMANY

Patients can move
the position of the
headrest cushion up or
down independently
single handed.

Unrivalled sitting and lying
experience thanks to the multi-
layered upholstery structure
and the use of the highest
quality materials.

5 motors for quick and gentle
adjustment of back, foot and
seat sections as well as height
adjustment and footrest.

Optimal hygiene

Smooth surfaces and three-part lying surface ensure **quick and easy cleaning**, even in the spaces in between. The absence of Velcro as a fastening method ensures the highest hygiene conditions.

The upholstery can be permanently protected from dirt with a **PVC protective cover**. The protective cover is available for the leg section, the armrest and the headrest cushion.

Add more colour to your surroundings

The **high-quality design** of the therapy chair with your choice of upholstery colour makes it an ideal addition to any hospital, clinic or doctor's surgery.

A **wide range of synthetic leather colours** will also help you to create a pleasant and relaxing atmosphere in your environment.

The **pleasant feel and excellent material properties** ensure long-lasting, easy-care and comfortable use.

The closed leg section supports the highest level of hygiene requirements.

The illuminated handset is easy to understand. 5 motors offer flexible options.

The central locking mechanism enables the brakes to be released and locked quickly and easily.

Equipotential bonding increases safety for your patients.

QUALITY
MADE IN
GERMANY

For medical facilities, we recommend the upholstery fabric skai® Pandoria Plus. This high-quality material is not only particularly flame-retardant, highly abrasion-resistant and biocompatible, it is also antibacterial (ISO 22196).

Comfort Line2 allows flexible adjustment to sitting, relaxing, lying and shock positions.

Cycling during dialysis has been proven to improve patients' coordination, strength and endurance and can have a positive effect on their well-being and quality of life.

Shared operating elements such as door handles and window handles are key sources of infection. The (optional) pedal control separates the important height adjustment from the other functions and significantly reduces the risk of infection.

Technical data

Dimensions

Width incl. armrests	90 cm
Width of the seat	58 cm
Overall length	203 – 230 cm
